VASCULO®
INSPIRED BY NATURE
IMPROVES CIRCULATION • HELPS AGAINST THROMBOSIS AND ARTERIOSCLEROSIS
ENHANCES IMMUNITY AND IMPROVES OVERALL HEALTH

According to the statistics, over 900 million people have poor circulation, while cardiovascular diseases are the leading cause of death both in our country and globally. Blood supplies cells with oxygen and nutrients, and removes carbon dioxide and waste materials. If blood circulation is impaired, cells, certain organs and the entire body can be at risk. This can lead to a series of diseases that are frequently misdiagnosed and, as a result, inadequately treated. In addition, poor circulation causes a wide range of symptoms such as brain fog, numbness, stinging, tingling in fingers or toes, leg pain when walking, shortness of breath, fatigue and feeling cold. Poor circulation can lead to serious medical conditions such as high blood pressure, diabetes, thrombosis, stroke and heart attack. Circulatory problems can be caused by inflammation and accumulation of deposits in blood vessels. Sitting for long periods of time, lack of physical activity, excess body weight, smoking, and poor diet accompanied by excessive alcohol use can also affect circulation. Poor peripheral circulation leads to hormonal imbalance, which gives rise to problems with prostate, thyroid and adrenal glands, sexual dysfunction and other conditions that, if not treated on time, can seriously affect all body systems.

VASCULO® cleans and removes plaque from arteries, veins and even the smallest blood vessels - capillaries. As a result, VASCULO® successfully prevents and helps with serious diseases such as: atherosclerosis, thrombosis, gangrene, inflammation that causes a blood clot to form in superficial and deep veins (Thrombophlebitis), an open wound on the lower leg (Ulcer Cruris), aortic and arterial aneurysms, dementia and all other disorders caused by impaired circulation and poor condition of blood vessels.

The preparation is recommended as a preventative measure to people who do not feel any discomfort, as well as to people suffering from chronic or acute diseases.

All plants used to make the preparation have been thoroughly tested and contain essential oils, phenols, tannins, flavonoids, catechins, phytosterols, vitamins and other chemical compounds.

The preparation consists of high-quality domestic raw materials of known origin. The preparation contains the extracts of pot marigold flower (*Calendula officinalis*), common yarrow (*Achillea millefolium*), nettle leaf (*Urtica dioica*), St. John's wort (*Hypericum perforatum*), lemon balm leaf (*Melissa officinalis*), common agrimony (*Agrimonia eupatoria*) and red wine. It does not contain alcohol.

Red wine is rich in polyphenols that have vasoprotective (reduce vascular permeability and increase blood vessel elasticity), antioxidant, anti-inflammatory, anti-thrombogenic and potential anticancer effects.

The preparation is ready for use and does not contain alcohol.

Use: The recommended daily dosage is 100ml twice a day, in the morning and in the evening. After opening, keep the bottle closed in the refrigerator for up to 10 days. A package contains 6 litres, which is enough to cover the minimum intake time period of one month. If necessary, and in severe cases, repeat the treatment. Shake gently before use.

Produced in compliance with HACCP food safety system.

The product registration number and date in the database of the Ministry of Health of the Republic of Serbia: 21565/2022, September 23, 2022
